Revision Date: 10/19/16

User stories for Sprint 2:

User Story	Tasks	Story Points
As a user, I want to be able to log in with a Google or Facebook account, so that I can access the website or application.	Add views to the web interface to allow login to happen	3
	Add views to the mobile interface to allow login to happen	5
	Organize and fix the routing so that all the files are in one file server.js	5
	Test that user data is stored in databses and that login works	3
As a user, I want to post items to potentially trade with those of other users, so that I can exchange things I own for things I want.	Design the card that will hold the information of objects	7
	Allow the creations of objects and their storage in the MongoDB	7
	Have functions to allow searching objects by its characteristics in the database	5
	Create a view for web to allow uploading an object	5
	Create a view for mobile to allow uploading an object	6
	Make sure that the object created is linked to the right user	3
As a user I want the items that I post to be matched with others, so I am given options to make trades	Use the functions created for search to display objects cards in the web trading interface	13
	Create an algorithm that provides the best match possible with the given parameters	15
	Be able to start a match with another user. Have a button that sends notification for trade.	7
Total Story Per Day Points		84
